

### Food Hopping

- Create route using Google Maps
- Restaurants that can be hopped from
  - Move from food from dessert

### Game App

- Gaming social network for Loyola
  - Who is playing what in your area
  - Potentially Cordova
  - Maya and Linette have experience with something similar
- Reviews of a game?
  - And then see who has it?

### Final Idea:

#### Host-it

- Event planning app
- Think Facebook events
- Pages that include messaging, invite list, rideshare, and more
- Allow people to be added to events
- Purpose and more included in proposal.

## Meeting Notes - 03/17

- Food Crawl + Food Hopping

- Game App → too ambitious

login +  
sign-up

### Event Planner - Organization App

- Event Tracking
- Organize events + Notes
- Application idea
- feasible
- make it different
- make notifications fully functioning

- something working
- Github pages live
- updated mockups
- not too worried  
have something  
w/

\*  
→ Firebase  
for login bar

- Food Crawl  
→ make a route

- General Description Anthony, Sop, Linette - backend
- Mockups Mikey, Maya, Nida - frontend
- language you're using

Intro —  
What it is

- solution to problem.

→ trouble party planning  
this is a solution

- Tuesday @ 9:00AM

• Goals  
→

03.20.2019

## React Native vs. cordova

- steep learning curve - better professionally
- cordova is easy to pick up
- timeline  
1 month for completion
- George prefers - cordova  
→ better understanding of full-stack development

FINAL: CORDOVA

## UI Feedback

- Color Scheme NEEDS to change
- Need more contrast
- Access right away
- switch to black background
- Navigation Bar at bottom  
→ like Facebook
- Rule of 3  
→ don't click something more than 3 times to get to it

met @ 9am

SHARE GOOGLE DOC!!

03/24/2019

- Split up requirements doc amongst members.
- Deadline Wednesday.
- Starting code and repo from here on out - refer to that from now on
- Refer to Message Board for notes from here on out
